DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "at least one projection is spaced from said sealing disc when said closure member is mounted to the neck of the container" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. Claims 1-5 and 11-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the

claimed invention. There is no support in the disclosure as originally filed for "said at least one projection is spaced from said sealing disc when said closure member is mounted to the neck of the container". It should be noted the disclosure sets forth a sealing disc *including* a sealing layer.

3. Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear how the sealing disc is "adjacent an inner face of a bottom wall of said cap".

Claim Rejections - 35 USC § 103

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 1,2,5,11,12, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keith (US 2,009,666).

Keith discloses a closure comprising a sealing disc (31) including an outer annular portion projecting radially outwardly from an opening edge of a container, a ring and a closure member, the ring having at least one projection (formed by the series of flutes (24) providing an upward force on the sealing disc in the removal direction and an inner screw thread. Keith does not disclose a sealing layer or the bottle body is made of plastic.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the bottle of Keith of plastic and the sealing disc of a multilayer structure including a sealing layer, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. A plastic bottle provides a

more resilient container and a sealing layer allows for the sealing disc to seal to the edge of the container.

Allowable Subject Matter

6. Claims 3,4,13-6, and 18-20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 1st and/or 2nd paragraphs, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. In view of the new grounds of rejection, this Office action is made non-final.

9. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F.R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
